Greenlee® Communications new DataScout™ 10G: The smart tablet that goes beyond test & measurement

Greenlee® / A Tectron company (NYSE: TXT) continues to drive innovation with the Greenlee Communications new DataScout™ 10G rugged touch screen tablet developed for service provider, utility, smart grid, mobility and enterprise network testing technicians looking for increased productivity and efficiency in a network analyzer.

The new DataScout™ 10G combines multiple test interfaces into a single simple to use, fast to learn network analyzer that is capable of simultaneously testing everything from 10G Ethernet, DS3/DS1/DS0/Datacom, TIMS and network timing. Its 'ready to test feature' is three times faster, compared to competitive network analyzer models currently on the market.

The new DataScout™ 10G network analyzer has an all-in-one rugged design that eliminates the need to carry or lose bulky modules. This one analyzer replaces up to eight handheld devices and a separate laptop that a technician would have to use in the field. The touch screen tablet design allows for both portrait and landscape modes, intuitive test configuration and exportable test result.

"We are able to create unique configurations to meet the individual workgroup needs of our customers, said Ken Fridley, Greenlee Communications Product Manager. "The DataScout is the only test solution on the market capable of testing 10Gb Ethernet while still supporting legacy TIMS testing, making it a complete test kit for utilities."

For a product demonstration, please contact Greenlee Communications at 1-800-642-2155.

Greenlee Communications

The Greenlee Communications brand offers a complete line of innovative and industry-leading test and measurement solutions for the communication service provider industry. Our expertise and innovative solutions address all stages of network deployment enabling the development, installation and maintenance of xDSL, fiber, cable and wireless networks. It is a leading brand of test and measurement solutions in the global communications industry with a long track record of delivering high quality innovative solutions enabling technicians to achieve their goals in a timely manner and with confidence.
