Read and understand all of the instructions and safety information in this manual before operating or servicing this tool.
Description

The Greenlee Inline Battery-powered Pressing Tool is a hand-held, self-contained pressing tool intended to press the following:

- 1/2" through 1-1/4" copper and steel press fittings and valves
- 1/2" through 1-1/2" PEX fittings and valves

This tool is protected by U.S. Patent No. 6,276,186, 6,401,515, 6,718,870, 7,086,979, 7,216,523, and 7,254,982.

Safety

Safety is essential in the use and maintenance of Greenlee tools and equipment. This manual and any markings on the tool provide information for avoiding hazards and unsafe practices related to the use of this tool. Observe all of the safety information provided.

Purpose of this Manual

This manual is intended to familiarize all personnel with the safe operation and maintenance procedures for the following Greenlee tool:

INLNPRESS-TOOL19kN
 Inline Battery-powered Pressing Tool

Keep this manual available to all personnel.

Replacement manuals are available upon request at no charge at www.greenlee.com.

Do not discard this product or throw away!

For recycling information, go to www.greenlee.com.
IMPORTANT SAFETY INFORMATION

SAFETY ALERT SYMBOL

This symbol is used to call your attention to hazards or unsafe practices which could result in an injury or property damage. The signal word, defined below, indicates the severity of the hazard. The message after the signal word provides information for preventing or avoiding the hazard.

**WARNING**

Wear eye protection when operating or servicing this tool.
Failure to wear eye protection could result in serious eye injury from flying debris or hydraulic oil.

**WARNING**

Skin injection hazard:
Do not use hands to check for oil leaks. Oil under pressure easily punctures skin. If injured, seek medical attention immediately to remove oil.
Failure to observe this warning could result in serious injury, gangrene, or death.

**WARNING**

Do not use solvents or flammable liquids to clean the tool body. Solvents or flammable liquids could ignite and cause serious injury or property damage.

**WARNING**

Pinch points:
- Remove battery before changing dies, adapters, or jaws.
- Keep hands away from the pressing tool head when pressing.
Failure to observe these warnings could result in severe injury or death.

**WARNING**

Do not dispose of batteries in a fire. They will vent fumes and may explode.
Failure to observe this warning could result in severe injury from harmful fumes or burns from flying debris.

**WARNING**

Electric shock hazard:
This tool is not insulated. When using this unit on or near energized electrical lines, use proper personal protective equipment.
Failure to observe this warning could result in severe injury or death.

**WARNING**

Read and understand all of the instructions and safety information in this manual before operating or servicing this tool.
Failure to observe this warning could result in severe injury or death.

**WARNING**

Immediate hazards which, if not avoided, WILL result in severe injury or death.

**WARNING**

Hazards which, if not avoided, COULD result in severe injury or death.

**CAUTION**

Hazards or unsafe practices which, if not avoided, MAY result in injury or property damage.

**DANGER**

Failure to observe this warning could result in severe injury or death.

**DANGER**

Failure to observe this warning could result in severe injury or death.

**DANGER**

Skin injection hazard:
Do not use hands to check for oil leaks. Oil under pressure easily punctures skin. If injured, seek medical attention immediately to remove oil.
Failure to observe this warning could result in serious injury, gangrene, or death.

**DANGER**

Do not use solvents or flammable liquids to clean the tool body. Solvents or flammable liquids could ignite and cause serious injury or property damage.

**DANGER**

Pinch points:
- Remove battery before changing dies, adapters, or jaws.
- Keep hands away from the pressing tool head when pressing.
Failure to observe these warnings could result in severe injury or death.

**DANGER**

Do not dispose of batteries in a fire. They will vent fumes and may explode.
Failure to observe this warning could result in severe injury from harmful fumes or burns from flying debris.

**DANGER**

Failure to observe this warning could result in severe injury or death.

**DANGER**

Failure to observe this warning could result in severe injury or death.

**DANGER**

Failure to observe this warning could result in severe injury or death.
**IMPORTANT SAFETY INFORMATION**

### WARNING
Inspect tool and jaws before use. Replace any worn or damaged parts. A damaged or improperly assembled tool can break and strike nearby personnel.
Failure to observe this warning could result in severe injury or death.

### CAUTION
- Do not use this tool for continuous use. After 30 to 40 cycles, allow the tool to cool for 15 minutes.
- Do not secure this tool in a vise. This tool is designed for hand-held operation.
- This tool may be used in damp or wet environments; however, air-drying is recommended before use if the tool becomes soaked. Damage may result when the tool is operated prior to thorough drying when electrical components are soaked.
- Use this tool for the manufacturer's intended purpose only.
- Do not operate this tool without a fitting in place. Damage to the pressing head can result.
Failure to observe these precautions may result in injury or property damage.

### CAUTION
An incomplete press can cause leaks.
- Use proper fitting and tubing combinations. Improper combinations can result in an incomplete press.
- The relief valve will sound and the drive rollers automatically retract when a complete press has been achieved. If you do not hear a “pop” and the drive rollers do not automatically retract, the press is not complete
Failure to observe these precautions may result in injury or property damage.

### CAUTION
Do not allow anything to contact the battery terminals.
- Do not immerse the batteries in liquid. Liquid may create a short circuit and damage the battery. If batteries are immersed, contact your service center for proper handling.
- Do not place the battery into a pocket, tool pouch, or tool box with conductive objects. Conductive objects may create a short circuit and damage the battery.
- Do not place a battery on moist ground or grass. Moisture may create a short circuit and damage the battery.
Failure to observe these precautions may result in injury or property damage.

### CAUTION
- Do not store the battery at more than 122 °F (50 °C) or less than –4 °F (–20 °C). Damage to the battery can result.
- Do not use another manufacturer's charger. Other manufacturers' chargers may overcharge and damage the battery.
- Do not attempt to open the battery. It contains no user-serviceable parts.
Failure to observe these precautions may result in injury or property damage.

### CAUTION
Do not perform any service or maintenance other than as described in this manual. Injury or damage to the tool may result.
Failure to observe this precaution may result in injury and property damage.

Note: Keep all decals clean and legible, and replace when necessary.
Identification

1. Lock Pin
2. Pressing Head
3. Retract Button
4. LED Indicator (red)
5. Battery Lock
6. Battery Cartridge
7. LED Work Light (white)
8. Trigger

Specifications

Pressing Tool

Length ........................................................................................................ 14.41" (366 mm)
Width ........................................................................................................ 2.95" (75 mm)
Depth ........................................................................................................ 4.57" (116 mm)
Weight (with battery) ................................................................................ 3.9 lb (1.8 kg)
Operating Force ....................................................................................... 2.1 ton (19 kN)
Hydraulic Oil ........................................................................................... Biodegradable hydraulic fluid
Recommended Operating Temperature Range ...................................... 5 °F to 122 °F (–15 °C to 50 °C)

Battery Charger .................................................................................... Read the instructions supplied with the battery charger
Operation

⚠️ WARNING
Inspect tool and jaws before use. Replace any worn or damaged parts. A damaged or improperly assembled tool can break and strike nearby personnel.
Failure to observe this warning could result in severe injury or death.

⚠️ WARNING
Electric shock hazard:
This tool is not insulated. When using this unit on or near energized electrical lines, use proper personal protective equipment.
Failure to observe this warning could result in severe injury or death.

⚠️ WARNING
Wear eye protection when operating or servicing this tool.
Failure to wear eye protection could result in serious eye injury from flying debris or hydraulic oil.

⚠️ WARNING
Pinch points:
• Remove battery before changing dies, adapters, or jaws.
• Keep hands away from the pressing tool head when pressing.
Failure to observe these warnings could result in severe injury or death.

⚠️ CAUTION
An incomplete press can cause leaks.
• Use proper fitting and tubing combinations. Improper combinations can result in an incomplete press.
• The relief valve will sound and the drive rollers automatically retract when a complete press has been achieved. If you do not hear a “pop” and the drive rollers do not automatically retract, the press is not complete.
Failure to observe these precautions may result in injury or property damage.

⚠️ CAUTION
• Do not use this tool for continuous use. After 30 to 40 cycles, allow the tool to cool for 15 minutes.
• Do not secure this tool in a vise. This tool is designed for hand-held operation.
• This tool may be used in damp or wet environments; however, air-drying is recommended before use if the tool becomes soaked. Damage may result when the tool is operated prior to thorough drying when electrical components are soaked.
• Use this tool for the manufacturer’s intended purpose only.
• Do not operate this tool without a fitting in place. Damage to the pressing head can result.
Failure to observe these precautions may result in injury or property damage.

Important Features of the Unit
• The hydraulic unit incorporates an automatic retraction, which returns the drive rollers to their starting position when the maximum operating pressure is reached.
• The unit is equipped with a special brake, which stops the forward motion of the drive rollers when the trigger is released.
• The pressing head can be smoothly turned by 350° around the longitudinal axis in order to gain better access to tight corners and other difficult working areas.
Operation (cont’d)

Charging the Battery
Read the instructions supplied with the battery charger.

LED Work Light (white)
This LED automatically turns on when the trigger is pulled. It remains on for 10 seconds after the trigger is released.

LED Indicator (red)
This tool is equipped with a special circuit board incorporating several important features to inform the user about the current status of the unit. The LED signals in the following cases:

<table>

Pressure Sensor
This tool is equipped with a pressure sensor that alerts the user of an incomplete press.
- If the tool is manually retracted before completion of a press, the red LED and an audible beep will be active for 2 seconds.
- If the tool is unable to reach the required pressing force, the red LED, work light, and an audible beep will pulse until after the trigger is released.

Operating Procedure
1. Select the proper pressing jaw for the intended application. Examine the jaw for wear, damage, and dirt buildup. Clean the compression area, if dirty, with a soft cloth and light cleaning or lubricating oil, and a brass brush if necessary. Replace the jaw if worn or damaged.

   Before changing the pressing jaws, remove battery to avoid unintentional operation.
   Failure to observe this warning could result in severe injury or property damage.

2. Depress lock pin (see views below) and rotate counterclockwise to disengage the pin on the pressing tool.
Operation (cont’d)

3. Install the jaw into the pressing tool and align mounting hole in jaw with lock pin. Depress the lock pin to secure the jaw (see views below).

4. Compress the ends of the jaw together to open the jaws and locate the jaws around the fitting to be pressed (see view below).

5. Reinstall the battery and depress the tool trigger to press the fitting. Continue to depress the trigger until the relief valve actuates and the drive rollers automatically retract.

   Notes:
   
   If the drive rollers do not automatically retract, the press is incomplete.
   
   The pressing cycle can be interrupted at any moment by releasing the trigger.

6. Release the trigger until the drive rollers retract completely.

7. Compress the jaw ends together to open the jaws and remove the jaws from the pressed fitting.

   Notes:
   
   The pressing jaws must close completely to ensure a leak-free connection. Always check that jaws close completely during a pressing cycle and no foreign objects are between the pressing jaws and mechanism.
   
   The pressing cycle can be interrupted at any moment by releasing the trigger.
   
   If it is necessary to remove the jaws before a press cycle is complete, push the retract button. Pushing the retract button will cause the drive rollers to retract completely.
   
   If the pressing cycle must be stopped before the press is complete, and the jaws have to be removed from the fitting, the fitting should be replaced or pressed a second time.
Maintenance

**WARNING**

Wear eye protection when operating or servicing this tool. Failure to wear eye protection could result in serious eye injury from flying debris or hydraulic oil.

**WARNING**

Skin injection hazard:
Do not use hands to check for oil leaks. Oil under pressure easily punctures skin. If injured, seek medical attention immediately to remove oil.
Failure to observe this warning could result in serious injury, gangrene, or death.

**WARNING**

Do not use solvents or flammable liquids to clean the tool body. Solvents or flammable liquids could ignite and cause serious injury or property damage.

**WARNING**

Pinch points:
- Remove battery before changing dies, adapters, or jaws.
- Keep hands away from the pressing tool head when pressing.
Failure to observe these warnings could result in severe injury or death.

**IMPORTANT**

Relief valve adjustments must be done by an authorized service center.

---

Daily

*Before use:*
1. Inspect the tool for wear or damage, such as cracks, gouges, or chips.
2. Inspect the tool for damage or leaks.
3. Inspect the rotation of the head assembly. Fully retract the ram. The head should rotate no more than 350°. If damage is detected, contact Greenlee customer service at 800-435-0786 for warranty service or repair.

*After use:*
1. Use a damp cloth and mild detergent to clean the housing. Allow the housing to dry.
2. Fully retract the ram. Place the tool in the carrying case and store in a cool, dry place.
3. If necessary, recharge the batteries. Refer to the instructions supplied with the battery charger.

Monthly

1. Thoroughly clean all surfaces.
2. Check the oil level.

Annually or After 10,000 Presses

1. Replace the hydraulic oil.
2. Contact Greenlee customer service at 800-435-0786 for warranty service or repair.

Checking the Oil Level

1. Remove the screws holding the housing cover together.
2. Point the pressing head downward and remove the oil reservoir plug. Fill reservoir if necessary.
3. Replace the oil plug and housing cover.
### Troubleshooting

#### Before You Begin
1. Make sure that the battery is charged. Recheck the battery after several minutes to make sure the battery is holding its charge.
2. Use a nonflammable contact cleaner or pencil eraser to clean the electrical contacts on the battery and tool.
3. Reinstall the battery and check the tool again.
