## Greenlee<sup>®</sup> Communications Launches Professional Coax Cable Tool Kit

Greenlee<sup>®</sup> / A Textron Company (NYSE: TXT) is proud to introduce its newest additions to their coaxial maintenance kits, with the Professional Coax Cable Tool Kits (46602 and 46603) by Greenlee Communications. These two kits have been designed for the professional CATV cable installer to reproduce the exact same high-quality connections, every time.

There are two versions of the Professional Coax Cable Tool Kit, one equipped to cut short style RG59/6 “F” connectors (46602), and another for long style RG59/6 “F” connectors (46603). Each kit is equipped to cut, strip, terminate, and tighten coax connectors based on highly engineered specifications. They both contain 8 inch diagonal cutting pliers with laser-hardened edges and chrome-vanadium steel construction for strength, durability, and optimum cutting performance. It’s also equipped with the lightweight RG 59/6/6Q-7/11 Coaxial Cable Strippers that provide depth stop, allowing you to easily replicate exact cutbacks and a Velcro pad to pull back insulators without risk of injury. The 6-in-1 multi-tool driver can also be found included in each kit offering a multi-bit screwdriver, along with a LED water resistant penlight. In addition, the combo ratcheting closed and open ended 7/16” torque wrench is provided, engineered to tighten connectors up to 30 in-lb, all fitted to the custom grip pack with quick release belt clip.

The professional Coax Cable Tool Kit offers the convenience of having these six essential tools that are needed for coaxial installation, maintenance, and repair. Kits are available now for shorter (PA7602) or longer (PA7603) style “F” connectors offering a unique grip pack with tools to get the job done right.
